

**ABSTRACT OF THE DISCLOSURE**

A combustible pellet comprising municipal solid waste. The pellet has a water content of less than 10% by weight and a fuel value of at least 10,000 BTU. A process for the forming of a combustible pellet from municipal solid wastes, comprising the steps of removing solid hazardous waste from said municipal solid waste; subjecting the municipal solid waste so obtained to at least one step to separate recyclable products therefrom; and subjecting the resultant product to a shredding and a pulverizing step. A fluff with a water content of less than 10% by weight is obtained. The fluff is compacted to form a combustible pellet.
